

***X-Pro-USB-Interface
Step 1
Software-Installation***

Release: 02/06

Installationsguide for Hacker X-PRO-USB Software

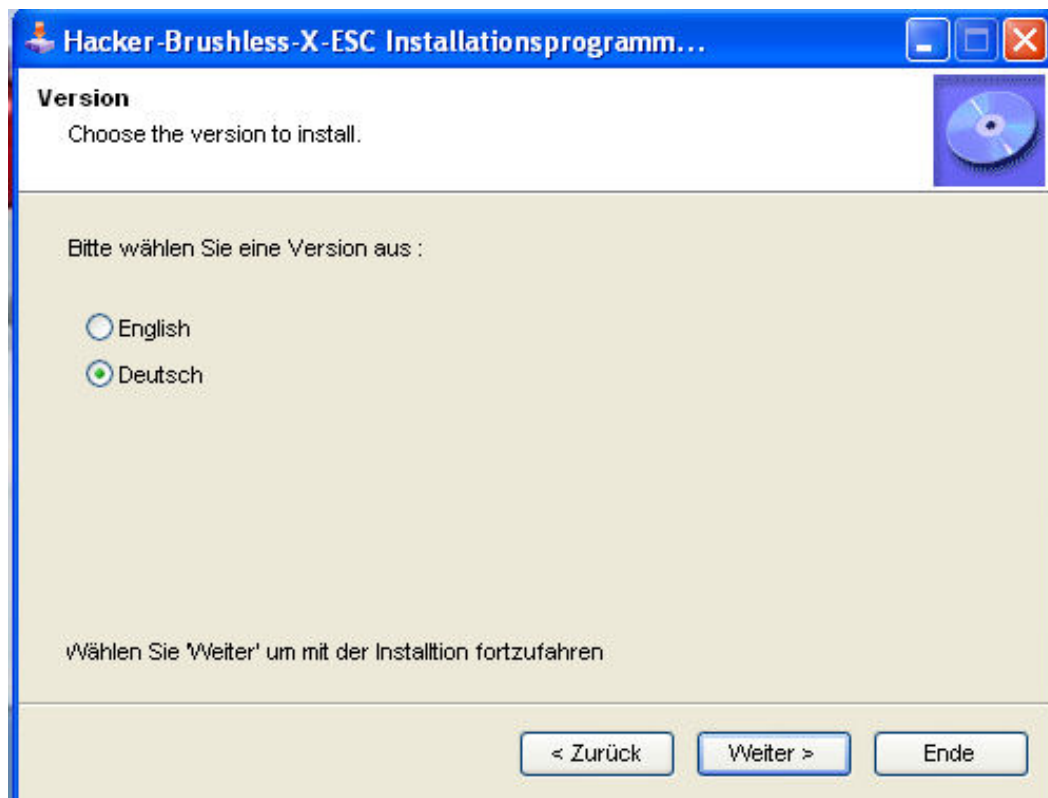

- put the CD into the CD drive of your computer
- dependent on the settings of your computer now the installation starts automatically or you click on "start" and then on "run". Type in the command line **d:\setup.exe**, the „d“ is a sample for your CD-Romdrive.

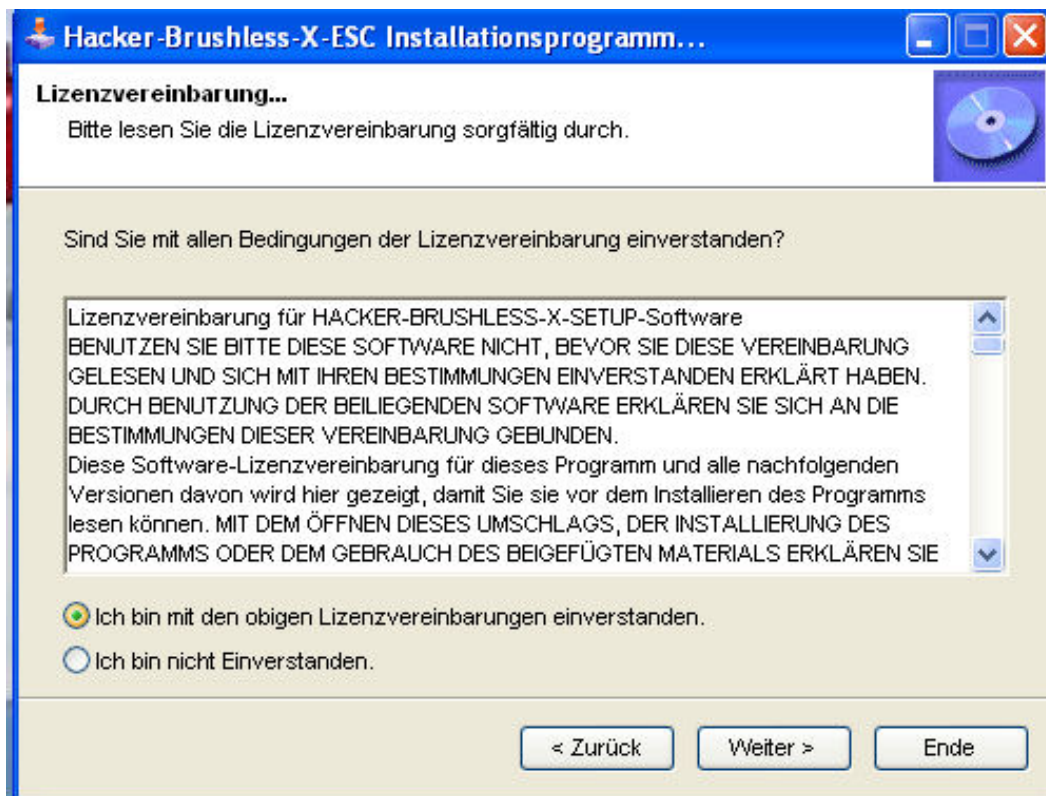

- installation starts:

- click „next“ and select the language:

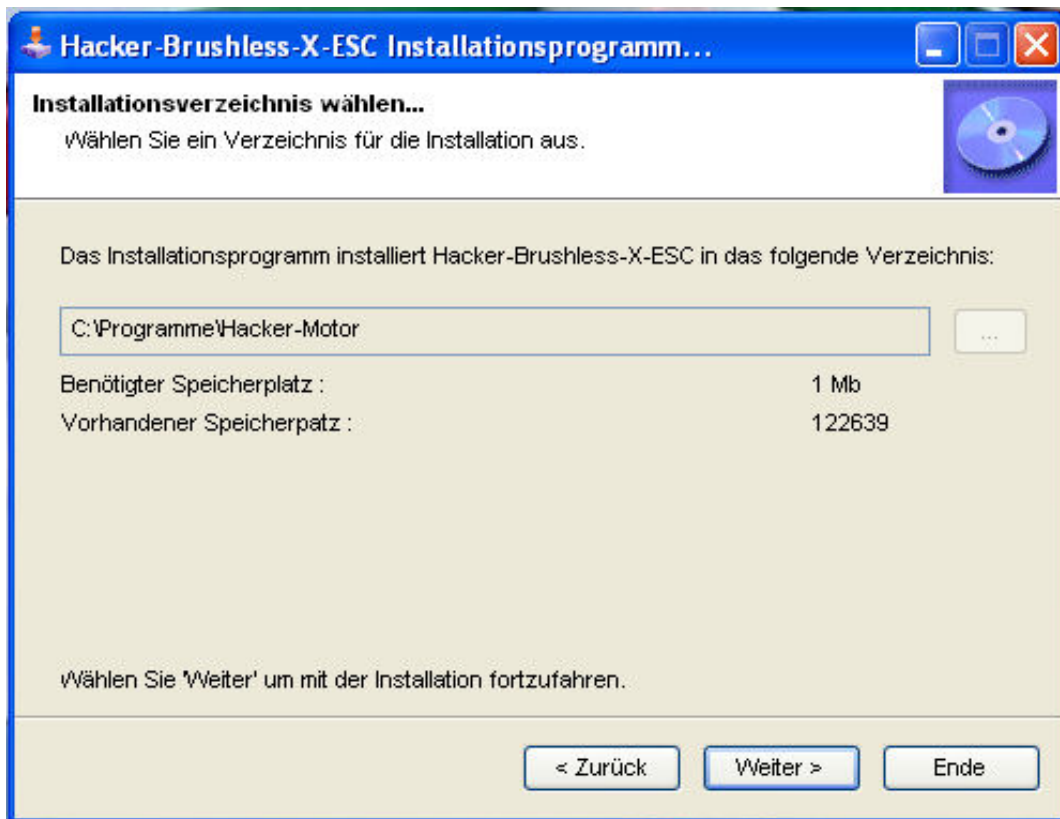

- click „next“

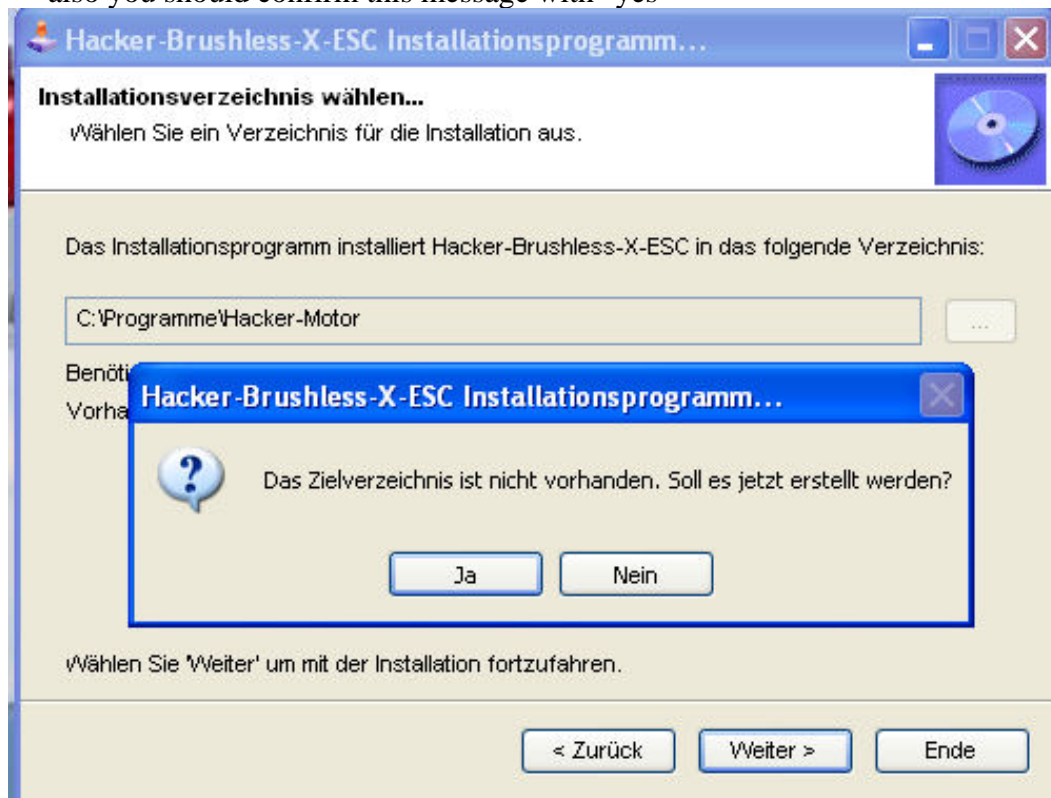

- Read the License agreement and if you agree click “I agree” and the button next.

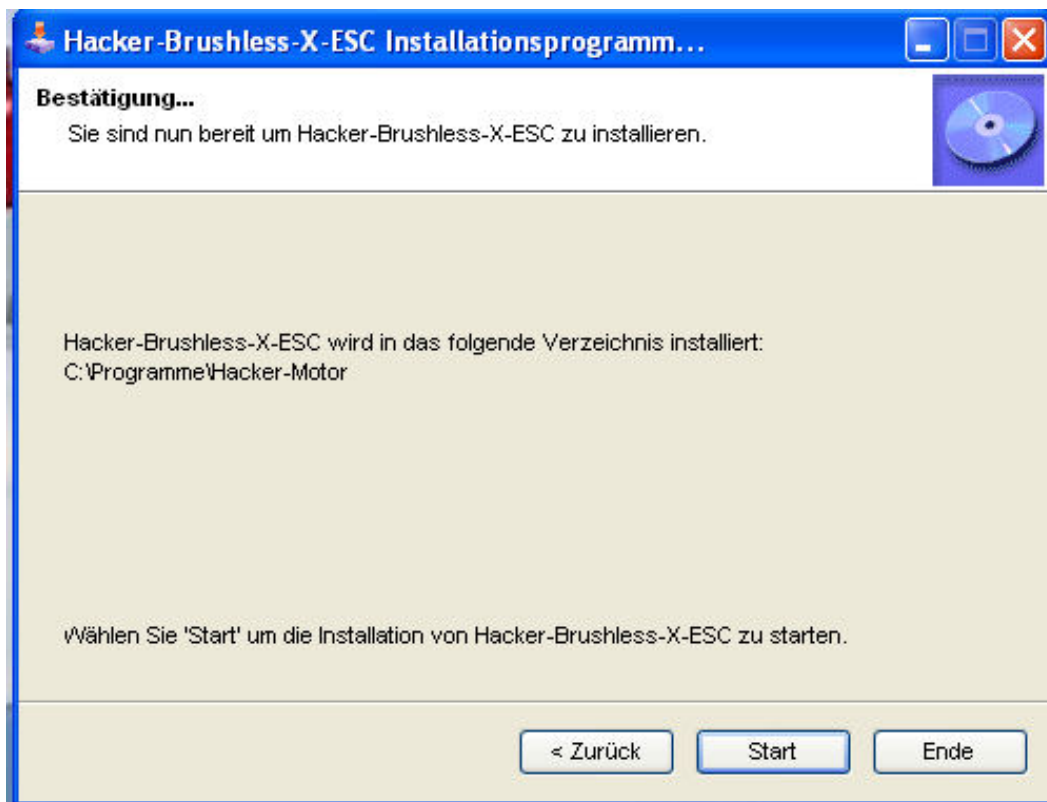

-next is the installation path of the program. Experienced PC users can change the installation path according to own desires. Normal way can the suggested path with "next" be taken over.

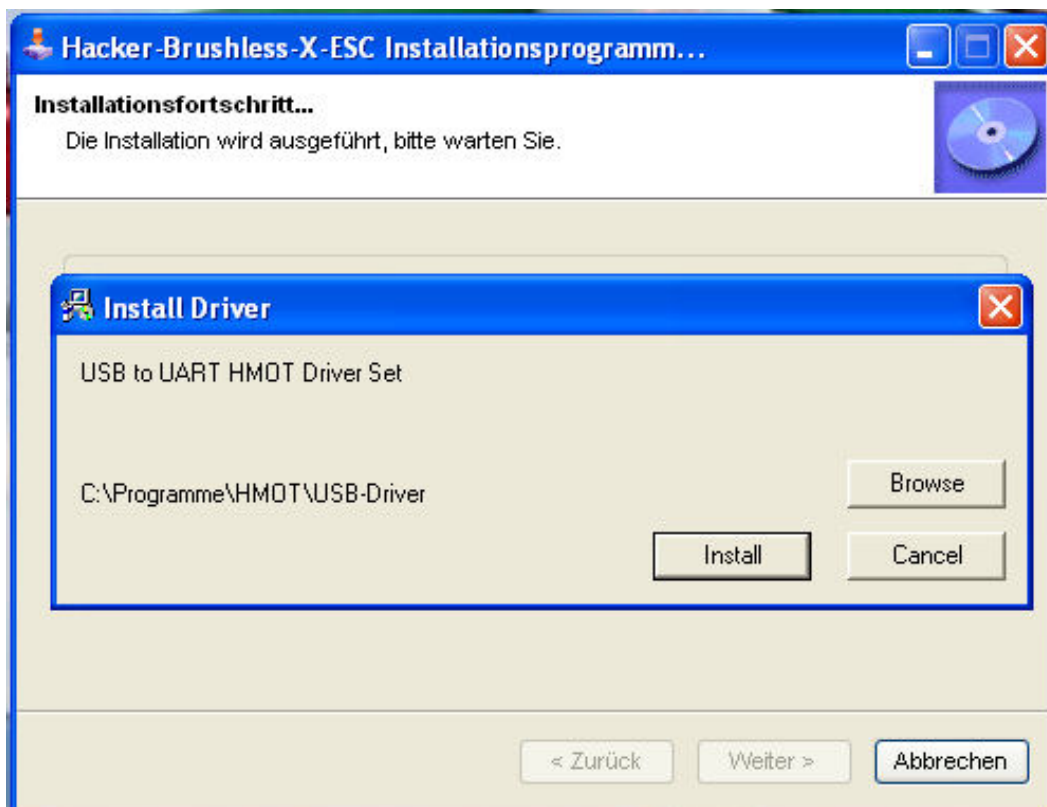

- also you should confirm this message with "yes"

- click the "start" button to begin the installation

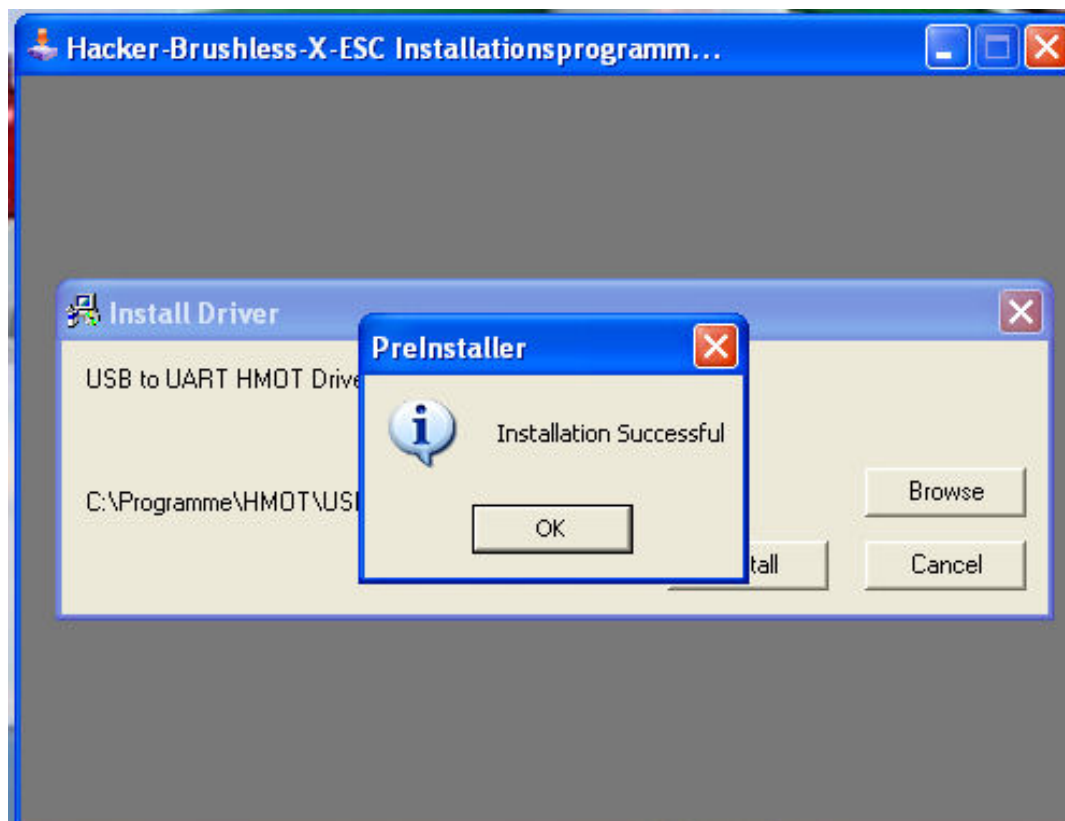

- USB-driverinstall, click „Install“

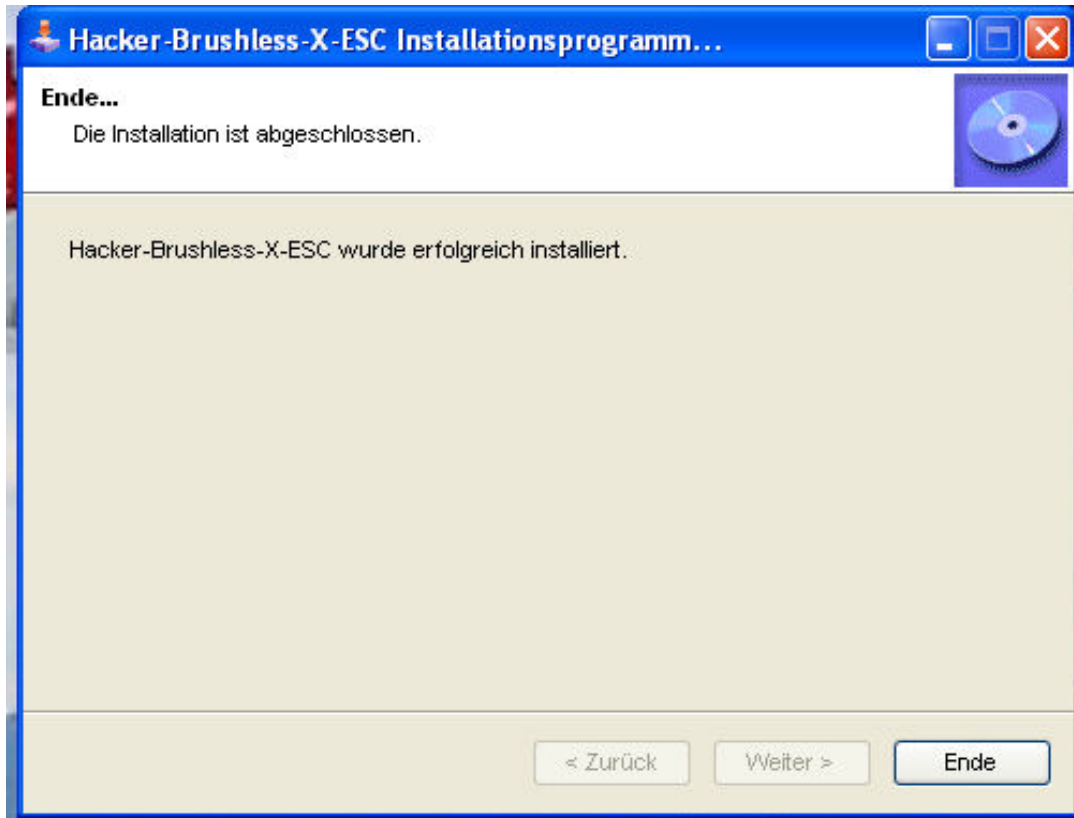

- Please go on with installation when you read this message, no problem!

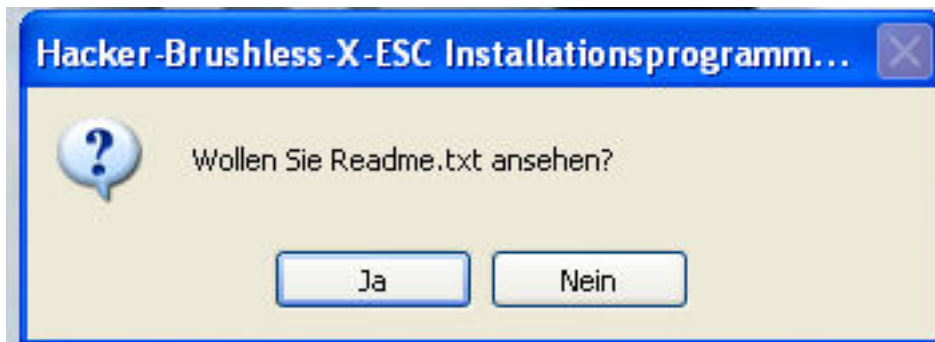

- Successfully installation is shown and press „OK“

- installation of the software is done and you receive the following message, click "end"

- further information you can find in the READ ME file, which you can read now if necessary
